

Double Deck Tuck Box Wrap Template

The wraps have a total size of 4.5" tall by 15" wide. This includes enough wrap to cover the front, back and two sides, plus a 1/2" tab/flap that you can either tape our glue to the box side when first attaching the wrap to the box. Do not build a bleed trim into the wraps, though you probably want to color the "glue flap" so that it matches the color theme you use on the box sides. Layout two wraps per 11" x 17" press sheet, using a .5" page border margin. Then position one wrap to the top left corner and the other wrap to the top right corner.
